In an effort to better protect consumers from identity theft, the Co-Op Supply and other organizations around the country have been mandated to implement new policies and procedures under the U.S. Fair and Accurate Credit Transactions (FACT) Act.

Among other things, the Co-Op Supply's identity theft program will identify account activities that are "red flags" to protect customers from potential identity theft and fraud. Financial institutions and issuers of debit and credit cards also will be implementing new policies and procedures to address identity theft.
